Descrição

- **Value:** This story will provide users with an easy and intuitive way to access the login, registration, and password recovery functionalities, enhancing system navigation and usability.
- **User narrative:**
Given: The user is on the homepage of the site.
When: The user clicks on the "Login" option in the navigation menu.
Then: They are redirected to the login page, where they can clearly see options to log in, register, or recover their password.
- **Requirements:**
 - Actors : Customers
 - Platform / Environment:
 - Web/Web mobile
 - Data
 - Creation of a database to store customer data.
 - Creation of an api for front-end integration with the database.
 - Creation of the login and registration screen to allow users to register and enter the page
- **Acceptance Criteria:**
 - Clicking on the "Login" option in the navigation menu on the homepage should redirect the user to the login page.
 - On the login page, the options to log in, register, and recover the password must be clearly visible and accessible.
 - Clicking on the registration option should redirect the user to the registration page.
 - Clicking on the password recovery option should redirect the user to the password recovery page.
 - The user should be able to navigate back to the homepage efficiently from the login page.
